

## Appendix 2 – Quality and Environmental Policy Statement

### Quality and Environmental Policy

The Top Management of Digital Advanced Control Ltd recognises that the disciplines of quality, health and safety and environmental management are an integral part of its management function. The Company views these as a primary responsibility and the key to good business practice.

The policy of Digital Advanced Control Ltd is to design, build and supply defect free products to its Customers, to specification and on time. We promote a professional atmosphere of continual improvement and always strive to do better. We know and believe that Customers come first, and support them through employee empowerment and continuous improvement.

Our Quality, Environmental and Health & Safety Management System ensures consistency in all phases of our operation and the quality of our products. Top Management continues to support and provide direction to reach this goal.

The Company's Quality and Environmental policy calls for continual improvement in its Quality management activities and business is conducted according to the following principles.

Digital Advanced Control will:

- Follow a concept of continual improvement and make best use of our management resources in all Quality & Environmental matters.
- Communicate our Quality & Environmental objectives and our performance against these objectives throughout the Company and to interested parties.
- Take due care to ensure that activities are safe for employees, associates, subcontractors and others who come into contact with our work.
- Work closely with our Customers and suppliers to establish the highest standards.
- Adopt a forward-looking view on future business decisions that may have Quality or Compliance impacts.
- Train our staff in the needs and responsibilities of Quality & Environmental management.

DAC considers respect for the environment a key business responsibility and encourages all stakeholders to take an interest in the protection of the environment.

Digital Advanced Control will therefore:

- Ensure that the company complies with appropriate legislation, regulations and other requirements to which the company subscribes.
- Identify and evaluate the environmental aspects associated with the supply of product and associated services in order to control and reduce any environmental impact, including the prevention of pollution.
- Ensure the responsible use of natural resources and the minimisation of waste and energy consumption.
- Implement the training of employees to ensure that they are environmentally aware and that neither they, the community nor the environment are exposed to harm as a result of DAC operations.

To help achieve these goals the company uses an integrated Management System which meets the requirements of ISO 9001:2015 and ISO14001:2015

Compliance, improvement and the effective operation of the Management System is monitored by process measures & internal audits and is maintained by the timely implementation of corrective and risk mitigation actions.
